INTRODUCTION

Neiroprime AI is a pioneering wind energy-consuming meme token designed to take advantage of the latest advances in blockchain technology. Built within the Solana ecosystem, this token bridges the gap between AI and the Solana meme token community, targeting the 2025 bull market.

As a unique fusion of blockchain, AI, and sustainable wind energy, Neiroprime AI not only promotes environmental sustainability through its reliance on renewable energy sources but also enables its holders to actively contribute to the decentralized future of blockchain energy solutions.

Our project aligns with Solana's vision of building an energy-efficient blockchain and leverages the wind-powered token to create future staking opportunities. By holding the Neiroprime AI token, coders and developers within the community can earn and farm \$WIND tokens—our native energy token; creating a dynamic ecosystem that supports sustainable blockchain usage.

NEIROPRIME AI UTILITY

Neiroprime AI goes beyond the typical meme token by integrating real-world utility through several key functionalities:

1

Wind-Powered Staking

Our staking platform utilizes wind energy as a proof of work mechanism, allowing token holders to stake their Neiroprime AI tokens and earn rewards in \$WIND tokens. This creates a self-sustaining ecosystem driven by renewable energy sources.

2

Artificial Intelligence Integration

By leveraging artificial intelligence (AI) to optimize energy distribution within the ecosystem, our platform enables efficient and scalable operations while driving community engagement and rewards.

3

Support for Solana Energy

Our staking platform utilizes wind energy as a proof of work mechanism, allowing token holders to stake their Neuroprime AI tokens and earn rewards in \$WIND tokens. This creates a self-sustaining ecosystem driven by renewable energy sources.

4

Future \$WIND Token Airdrop

By leveraging artificial intelligence (AI) to optimize energy distribution within the ecosystem, our platform enables efficient and scalable operations while driving community engagement and rewards.

LIST OF SOLANA PROJECTS CONTRIBUTING TO ENVIRONMENTAL AND ENERGY-EFFICIENT BLOCKCHAIN SOLUTIONS WE AIM TO PARTNER WITH, AND MORE.

FUSE

(X -@FuseEnergyHQ)

A project involving renewable energy distribution through its Project Zero token.

HNT

(X -@helium)

Decentralized wireless infrastructure promoting energy efficiency for IoT devices.

SOLAR

(X -@SolarNetwork)

An energy-efficient, decentralized blockchain network using Delegated Proof of Stake (D-PoS).

WATT

(X -@Wattprotocol)

The first volatility farming protocol on Solana, enhancing DeFi and giving asset power.

SOLUNA

(X -@SolunaHoldings)

Aiming to build a 900MW wind farm in Morocco for blockchain computing, focusing on renewable energy integration.

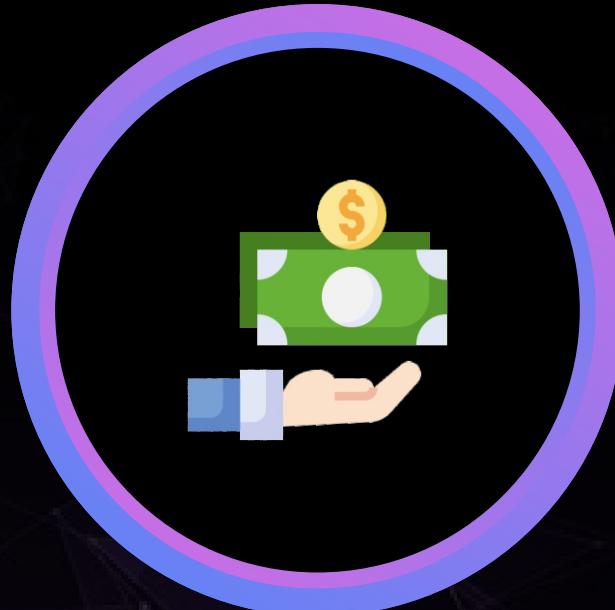

COMMUNITY PROJECTION

At the heart of Neiroprime AI is a visioned, strong, and engaged community that values sustainability, innovation, and decentralized governance. We envision the Neiroprime AI community to evolve into a collective of developers, coders, enthusiasts, and investors who share a common vision of building a blockchain-based future that is aligned with environmental sustainability.

Growth Strategy

Through strategic partnerships with Solana energy projects and blockchain developers, we aim to grow our community rapidly. Regular updates, airdrops, community events, and hackathons will foster active participation and innovation within the Neiroprime AI ecosystem.

Incentive Programs

Community engagement will be further driven by staking opportunities, yield farming, and rewards systems that benefit those who actively contribute to the platform's development and its decentralized governance model.

Collaborative Governance

We aim to implement a decentralized autonomous organization (DAO) model where community members can vote on project initiatives, governance decisions, and future developments.

COMPETITIVE ADVANTAGE

Neiroprime AI stands out in the market with several key competitive advantages:

Sustainable Energy Usage

By consuming wind energy, Neiroprime AI supports environmentally responsible blockchain applications, making it an attractive option for eco-conscious investors and developers.

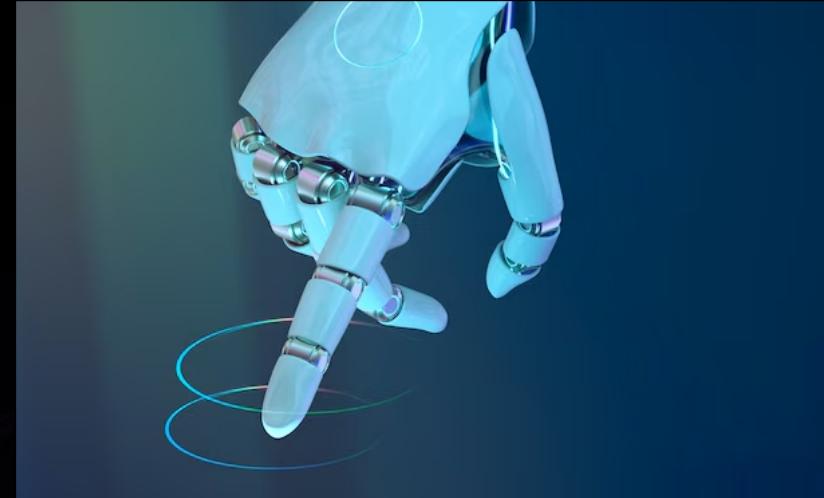

Solana's High-Speed, Low-Cost Ecosystem

As a Solana-based token, Neiroprime AI benefits from Solana's low transaction fees, high throughput, and energy-efficient consensus mechanism, providing a seamless experience for users and developers alike.

Integration of AI and Blockchain

Unlike traditional meme tokens, Neiroprime AI leverages artificial intelligence to optimize tokenomics, staking processes, and the efficient distribution of rewards, adding real-world utility to the platform.

First-Mover Advantage in Wind-Powered Blockchain Solutions:

With the launch of \$WIND tokens and the integration of wind energy into blockchain applications, Neiroprime AI is poised to lead a niche market of sustainable energy blockchain projects, positioning itself ahead of competitors in the renewable energy space.

TOKENOMICS

The Neiroprime AI tokenomics model is designed to reward community members while ensuring long-term project sustainability.

TOTAL SUPPLY

The total supply of Neiroprime AI tokens is capped at 10 billion tokens, ensuring a controlled release and limited supply.

90%

Community: The majority of tokens are reserved for the community to ensure broad participation and decentralization.

5% **Marketing:** Dedicated to marketing efforts, partnerships, and influencer outreach to expand the reach of Neiroprime AI.

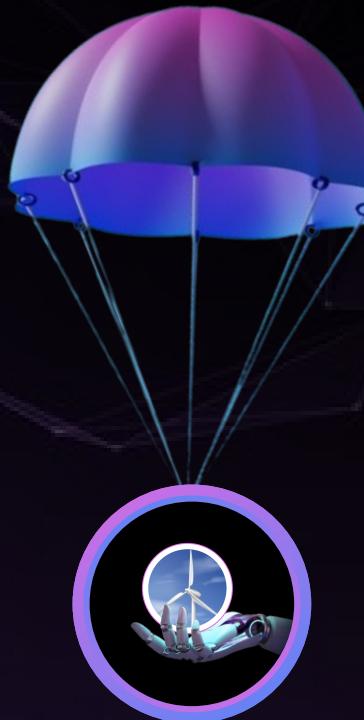

5% **Whitelisted:** Reserved for early investors and contributors.

AIRDROP

\$WIND Token Airdrop:

In January 2025, we will launch our energy token, **\$WIND**.

Community members holding Neuroprime AI tokens will be the first to receive the airdrop, providing them with early access to the new ecosystem and additional staking opportunities.

ROADMAP

Before then, we have been building the products and testing for months before launch. Before launch, all necessary protocols are put in place.

Q4 2024

(December 2024)

- **Neiroprime AI Launch:** Official launch of Neiroprime AI and distribution to whitelisted participants.
- **Strategic Partnerships:** Secure partnerships with Solana energy tokens and blockchain developers.
- **Community Engagement:** Initiate community events, airdrops, and bounty programs to build an engaged base of early adopters.

Q1 2025

- **\$WIND Token Airdrop:** Airdrop of \$WIND tokens to Neiroprime AI holders.
- **Staking Platform Launch:** Launch the wind-powered staking platform allowing users to stake Neiroprime AI and earn \$WIND rewards.
- **Energy Conference:** Host an inaugural blockchain energy conference to raise awareness and attract stakeholders.

Q2 2025

- **Gaming Integration:** Explore partnerships in blockchain gaming to bring utility to Neiroprime AI within decentralized games.
- **Ambassadors:** Acquire ambassadors from different countries of the world. They'll host off-chain hangouts and represent our project to build a stronger community.
- **Launchpad for Solana Projects:** Develop a launchpad that supports Solana meme and energy token projects.

Q3 2025

- **Decentralized Governance (DAO) Launch:** Roll out a DAO for decentralized decision-making within the Neiroprime AI community.
- **Expanded Utility:** Integrate AI-based energy management solutions across the ecosystem.
- **Content Marketing:** Host thread contest to create visibility.

Q4 2025

→ **Solana Hangout:** We will host community meetups and digital events on Solana, fostering a strong user base.

→ **X Spaces and Expansion:** Expand into new markets and continue to build the Solana meme token ecosystem through Twitter Spaces and cross-community events.

SOCIALS

Follow our social media channels to stay updated with the latest news, announcements, and community events:

GLOSSARY

Meme Token: A cryptocurrency inspired by internet memes and trends, often driven by community support.

Proof of Work (PoW): A consensus algorithm that requires computational work to validate transactions and secure the network.

Staking: The process of locking up cryptocurrency tokens to support the operations of a blockchain network in exchange for rewards.

DAO (Decentralized Autonomous Organization): An organization governed by smart contracts, allowing stakeholders to vote on decisions.

Airdrop: A distribution of cryptocurrency tokens to a wide audience, often used to promote the adoption of a new project.

Solana: A high-performance blockchain supporting decentralized applications and crypto projects, known for its energy efficiency.

Neiroprime AI combines AI and blockchain with a strong commitment to sustainability and renewable energy.

We're setting the stage for a new era of eco-friendly meme tokens, creating a decentralized world where energy is both consumed and rewarded responsibly.

Join us in transforming how blockchain powers a greener future.

**THANK
YOU!**
